

Hydraulic Hoses

ARG INDUSTRIAL

Providing Flexible Industrial Solutions to Power & Lift Your World.

Type

Hydraulic Hose

Type

1

Braided/Spiral Hose

Danfoss

2

Hydraulic Suction Hose

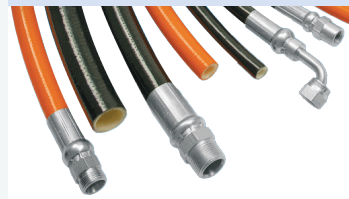

3

DOT Approved

4

Thermoplastic

5

Stainless Steel/Teflon

6

Special Application Hose

- Arctic Grade
- High Temp
- Extreme Pressures
- Abrasion Resistant
- Hose Bundles

Adapters & Quick Connects

Adapters

ARG stocks the most common fittings SAE and NPT. We have a large selection of metric, British, JIS, code 61, code 62 and cat flanges.

Quick Disconnects

ARG Industrial has a complete selection of quick disconnect couplers for every application.

ARG stocks JIC, ORS, Boss O-ring and NPT adapters. We have a large selection of metric, British, JIS, code 61, code 62, cat flanges, carbon steel, stainless steel, and brass.

Capabilities

Cleaning

What damages 90% of hydraulic systems? The answer is new hose. There are residuals left in a new hose when it is built. These are either metal or rubber that clog your filters and can damage the internals. ARG cleans every new assembly to an ISO 13/10 specification and seals the ends so no contamination can get in and damage your system.

RFID Tagging

ARG has the ability to install a RFID chip on all hose assemblies we supply. This will allow you to access hose asset information, including when the hose was made, how long it has been in service, and the last time it was tested, via PC or Mobile App.

Testing

NAHAD suggests that each new assembly be pressure tested at 200% of the maximum allowable working pressure. ARG has state of the art test facilities and capabilities, and performs pressure testing up to 30,000 psi at the customer's request.

Hydraulic Hose

ARG has been supplying custom hydraulic hose assemblies since 1969. You can call in or email your order to our expert staff. We'll have your assemblies ready for pick up at our will call counter.

Or, visit our show room and we'll make your hose assemblies while you wait. We excel in fabricating quality hose assemblies for every type of application from garden hose to 10,000 psi and everything in between.

We are the secret to your success!
