

Industrial Hoses

ARG INDUSTRIAL

Providing Flexible Industrial Solutions to Power & Lift Your World.

Type

Industrial Hose

Type

1

Air

- High Pressure
- Shop Airline
- Breathing Air
- Jack Hammer
- DOT Air • Sand Blast

4

Material Handling

- Vector Truck
- Mining Hose
- Fish • Cement
- Bark & Leaf

2

Water /Steam

- Suction & Discharge
- Water Blast
- Pressure Washer
- Irrigation
- Steam

5

Chemical

- Petrochemical
- Corrosives
- Solvents
- Liquid Fertilizers

3

Fuel, A/C, Transportation

- Tank Truck
- Dispensing
- Aviation
- Fuel Drop
- Vapor Recovery
- Automotive

6

Food Grade

- FDA 3A & NSF rated
- Hot cooking oil, Potable water, beer, wine, juice, milk, flour
- Stainless Sanitary Fittings

Connectors

End Connections

We stock a wide variety of end connections; NPT, NST (fire), NPSH, Camlok (cam & groove), flange (150# & TTMA), Victaulic and weld stub ends. Carbon steel, stainless, brass, aluminum and composite materials available.

ARG supplies assemblies that fit and meet many industrial specification requirements: USCG, API 1529, MSHA, NSF61, FDA and Arctic Grade.

Attachments

Full line of assorted attachable end connections to compliment your particular needs.

Capabilities

Crimping

The most secure method of attaching end connections to a hose is by using a crimp collar or sleeve. At ARG we have developed crimping procedures to make sure every style of hose has its own specifications to insure the highest fitting retention. Other options available are bands, clamps and push-on depending on the hose that best suits your needs.

RFID Tagging

ARG has the ability to install a RFID chip on every hose assembly we supply. This will allow you to access the asset information to see exactly when the hose was made, how long it has been in service and the last time it was tested. Tested assemblies can be fitted with RFID chips for field identification and cert tracking.

Testing

NAHAD suggest that each new assembly gets pressure tested to one and half times the maximum working pressure before they are put into use. ARG can test and certify assemblies up to 30,000 psi.

Industrial Hose

Since 1969, ARG Industrial has been a trusted supplier of custom-made industrial hose assemblies. Our dedicated staff is ready to assist you whether you prefer to call in and pick up your product at our convenient will call counter or bring in your damaged hose and have a new one created on the spot. With our expertise, we excel in manufacturing for a wide range of applications, including food, tool airlines, fuel dispensing, chemical transfer, and even 8" material handling.

We are the secret to your success!
